Who We Are

The Securities and Exchange Commission (The Commission) was established in 1979 as the apex regulatory body to regulate and **develop** the Nigerian capital market. It derives its mandate from the current enabling law, the Investments and Securities Act (ISA), No. 29, 2007.

Objectives

The Commission's objectives include:

- ensuring the existence of a stable, orderly, transparent, fair, efficient and viable market that protects investors and is internationally competitive;
- enforce the ISA, 2007, Rules & Regulations and Codes made pursuant thereto as well as other relevant laws.
- maintain zero tolerance for market abuses:
- develop and deepen the market by promoting the introduction of new products and processes;
- contribute to the nation's economic growth and development.

Vision Statement

To be Africa's leading capital market regulator.

Mission Statement

To develop and regulate a capital market that is dynamic, fair, transparent and efficient to contribute to the nation's economic development.

Brand Driver

...towards a world class market

Core Values

The Commission's structure consists of the Board, the office of the Director General and three Directorates headed by Executive Commissioners. The Board consists of the Chairman, Director General, three Executive Commissioners, two Non-executive Commissioners and a representative each from the Central Bank of Nigeria and the Federal Ministry of Finance.

am delighted to present the 2014 Annual Report of the Commission

The Commission continued its reforms and initiatives to consolidate the recovery of the stock market. As expected, 2014 commenced with an impressive All-Share index of 41,329.19. The equities market opened on a buoyant note. The year looked even brighter and held more promises as the All Share Index peaked at 42,482.48 throughout the first half of the year. This could be partly attributed to the positive impacts of the nation's Gross Domestic Product (GDP) rebasing exercise conducted by the National Bureau of Statistics (NBS) which confirmed Nigeria as the largest economy in Africa.

A total of twenty nine (29) new issues were approved in 2014; twenty-one (21) of which were equity issues worth N347.39 billion. Other issues approved by the Commission were seven (7) corporate bonds worth N92.19 billion and two (2) sub-national bonds amounting to N21.30 billion. Thus, the total value of issues approved in 2014 stood at N460.88 billion. The Commission also registered the African Development Bank's \$1billion medium term notes programme and further efforts are being made towards developing the fixed income market. Whilst the primary market fared better in 2013 in terms of number of new issues with a 6.45% decrease, the year under review shows 68.06% increase in value of new issues.

During the year under review, the Commission handled a total of 1,066 complaints out of which 388 were new complaints. A total of 573 were resolved (an improvement over the 415 resolved cases in 2013), whilst 82 were referred for enforcement actions. The total sum recovered for investors through the complaints management framework was in the tune of N2, 360, 501, 339.48 which is an improvement on the N597, 033, 448.98 recovered in 2013.

In April 2014, the market witnessed the initial public offerings and dual listings of Seplat Petroleum Company Plc's shares on the Nigerian Stock Exchange (NSE) and London Stock Exchange (LSE) in what signaled the emergence of major indigenous players in the Nigerian oil and gas industry in the capital market. Also, in the year under review, the Nigerian Stock Exchange (NSE) became a full member of the World Federation of Exchanges (WFE) and the first African Stock Exchange to join the International Surveillance Group (ISG). In a bid to engender market integrity and create a conducive environment for market development, the Commission amended some rules and introduced new ones in 2014. These include the rules on Foreign Collective Investment Schemes, Infrastructure Funds, Complaint

Management Framework, Funding of the Investments and Securities Tribunal (IST) from the secondary market amongst others. Some sundry amendments included Rule on Take-over Bids pursuant to Section 131 of the ISA, amendment on rule on Securities Lending and Borrowing, amendment to the Code of Corporate Governance for Public Companies, amongst various others.

As part of efforts made towards engendering investor confidence, the Commission reiterated the need for accountability and transparency as core pillars of corporate governance by directing that any document prepared by auditors on behalf of capital market operators must be personally signed by a named auditor or partner as against the present practice of stamping the name of the audit firm on the document: The aim of the directive is to ensure the reliability of financial reports and other disclosure documents as well as to bring financial reporting in Nigeria in line with international best practices.

In addition to increasing public awareness about market and other regulatory activities, the Commission also cracked down on unauthorised operators as a way of protecting unsuspecting investors and the integrity of the market.

In 2014, through the platform of the Capital Market Committee (CMC), a 10-year Strategy was crafted to position the capital market for growth. The 10-year Capital Market Master Plan details the magrowth strategy for the next 10 pleading to 2025. In line with global practice, the strategic plan also see develop capital market literacy and interest capital market products.

The upward momentum experience the equities market earlier in the year however transient as the year was me by several macroeconomic factors. I included the devaluation of the launfavourable developments in geconomy especially precipitous dracerude oil prices, Quantitative Easing policy of the US Federal Reserve Tapa which had liquidity reversal effect frontier & emerging markets and capital market's sensitivity dielectioneering periods.

These factors have weighed heavi investor confidence thereby triggs portfolio outflows as evident in the be trend witnessed in the Nigerian market during the last quarter of 2014 Thus, unlike the year 2013, year seems to have ended on a not too inst note for the market. However, in course of the year 2015 , we exped the bearish sentiments in the mark subside and the market to rebound. International Monetary Fund (IMF forecasting a 5.0% GDP growth for No in 2015. The Commission remains for and committed to promoting an efficient and transparent capital market with strong hope that the federal policie

economic diversification, infrastructural development and electricity reform will bring the much desired respite and resultant growth for our capital market.

Mal. Suleyman .A. Ndanusa, OON Chairman Securities and Exchange Commission

Mal. Suleyman .A. Ndanusa, OON Chairman Securities and Exchange Commission

2014 was a year of mixed fortunes for the Nigerian capital market. Following an impressive second consecutive year in which the Nigerian stock market featured among the 10 best performing in the world, market capitalization of listed equities reached an all-time high of N14.2 trillion only to close the year at N11.5 trillion. In spite of the headwinds that brought about this decline, the Securities and Exchange Commission (SEC) continues to lead the market's transformation to world class and enable it to catalyze Nigeria's socioeconomic advancement. I have the honour to present the 2014 edition of our annual report which outlines the SEC's financial position, our initiatives during the year, the milestones recorded, and the performance of our market, as well as the prospects for 2015 and beyond.

International and Domestic Macroeconomic Environment

The global economy showed stronger signs of recovery in 2014 bolstered by resurgence in important developed economies like the United States, United Kingdom and Canada. Lingering concerns however still trailed the Eurozone debt crisis and slowdown in major emerging markets. This watered down optimism, leading to falling energy demands in the midst of increased global supply from traditional importers of crude oil.

Declining crude oil prices therefore became

the defining factor throughout the shalf of 2014 in Nigeria. This necessita 8 percent devaluation of the Na addition to other measures to the money supply, tame inflation and down the depletion of the Nation's forces reserves. Uncertainties around the general elections further accent concerns which negatively imprinvestor sentiment.

Performance of Market Segment

The Bond Market

In complete contrast to the impreforeign interest our bond market attrin 2013, there was a net outflow of fit portfolio investments from the dombond market in 2014. This did litt dampen interest from issuers howeve companies and 2 State govern successfully raised about N200 to during the year from the bond market is in addition to the 30 issues of FGNs by the Debt Management Office valuabout N950 billion over the same period.

The Equities Market
In April 2014, we approved the historic listing of Seplat Petroleum Develop. Company, an indigenous upstream of on the London Stock Exchange (LSE the Nigerian Stock Exchange (NSE), was the largest initial public offering in Africa for 2014 valued at \$1.9 to which revived hope of a revival in market African IPO market.

The secondary segment of the equities market succumbed to macroeconomic as well as geopolitical headwinds to close the year 16 percent lower than its level at the end of 2013. The All Share Index (ASI) of the NSE closed the year at **34,657.15 points**. Only two of the eight sector indices appreciated during the year with the NSE-ASEM and NSE Oil/Gas appreciating by 26.09% and 11.8% respectively.

Collective Investment Schemes
Collective Investment Schemes (CIS)
outperformed the market in 2014 closing at
aggregate net asset value (NAV) of N176
billion, a 14 percent appreciation compared
to the 16 percent depreciation of market
indices. The fund management landscape
in Nigeria continues to be more
professionalized supported by the SEC's
drive to expand access to its wealth
creation potential to all Nigerians.

Prospects for 2015 and Beyond
To consolidate the reforms we started in
2010 and provide a clearer path for the
capital market going forward we launched
comprehensive 10-year master plans for
financial literacy, non-interest capital
market products and the entire capital
market in 2014. These strategy documents
will form the reference document for the
SEC and the capital market community in
the quest to develop world class capital
markets in Nigeria.

The SEC shall continue to lead the capital market community within the framework of

the capital market committee (CMC) to fashion out ways to lead the Nigerian capital market to the next level.

I specially commend the efforts of staff of SEC and other market participants in this journey to world class. Together we are bequeathing to Nigeria a stronger, deeper and more prepared capital market that will catalyze Nigeria's socioeconomic development.

STAFF SUMMARY

The Commission's staff strength as at 31 December, 2014:

Number of Staff according to cadre

| S/N | Categories of Staff | Moneyle | |
|-----|---------------------|---------|--|
| 1. | Senior Staff | Number | |
| 2. | Junior staff | 465 | |
| | | 134 | |
| | Total | 599 | |
| | | 399 | |

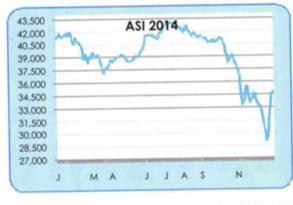

The equities market recorded a steady increase during the first half of 2014, with the All-Share index rising from 41,329.19 points to peak at 42,482.48 points in June 2014. This growth was however eroded with the All Share index closing at 34,657.14 points as at 31 December, 2014. This represents a decline of 16.14% when compared to its value in the previous year. See chart 1.

Foreign participation remained strong throughout the year with significant increase noted in recorded transactions towards the end of the year. From an

almost equal split in January 2014 of 49.28% to 50.72% in the order foreign: local, transactions dramatically shifted to 80.92% to 19.08% in favour of foreign participation in November 2014 and ended in a 48.24% to 51.76% split following a rebound of domestic transactions in December. An increase of 41.83% was recorded as total transactions at the nation's bourse rose from N181.97 billion in January 2014 to N258.08 billion in December 2014.

NSE All Share Index Trend

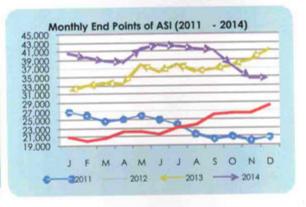

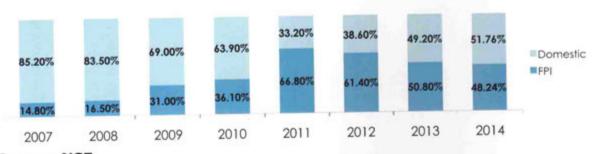

Chart 2: Domestic Vs Foreign Participation in the Nigerian Capital Market (2007 2014)

Source: NSE

The value of equity and debt securities floated in 2014 increased as compared to 2013. Most remarkable was the 771.36% increase in the value of corporate bonds floated by seven private institutions (more than twice the number of corporate organizations which patronized the capital market in 2013).

The Commission approved a total of twenty nine (29) new issues in 2014. Twenty (20) of

these were equity issues worth N347.39 billion, while nine (9) were bonds worth N113.49 billion. Thus, the total value of approved issues in 2014 stood at N460.88 billion.

The Debt Management Office (DMO) issued a total of thirty (30) bonds valued at N947.11 billion in 2014 compared to 31 FGN bonds worth N898.34 billion recorded in 2013. This excludes non-competitive allotments.

| 4 | Government Secondary School Akim Calabar Cross River state | 4 th |
| 5 | Chapel Secondary School Ilorin, Kwara State | 5 th |
| 6 | Federal Government College Azare, Bauchi State | 6 th |

IV. Production of "Corporate Thieves" – A Capital Market Soap Opera

The Commission and Wale Adenuga Productions (WAP) collaborated to produce and air a Capital Market-oriented drama series titled Corporate Thieves to provide Capital Market education to Nigerians through drama. This soap opera started airing on some television stations in December 2014.

V. Lecture series for National Youth Service Corp (NYSC) Members

Lecture series on OPPORTUNITIES
IN THE NIGERIAN CAPITAL
MARKET- A Guide for Graduates was
organized for corp members in
orientation camps across the
country.

The Lectures were adjudged to be educative by corp members and NYSC officials. 28,675 SEC publications were distributed during the lectures.

VI. Excursions to the Commission by Academic Institutions

The visits were aimed at exposing

students to the fundamentals of the capital market. A total of 479 students from 16 schools (14 universities and 2 secondary schools) visited the Commission in 2014. Papers presented to the students include "Functions of the SEC" and "How to invest in the Nigerian Capital Market". Short movies on the capital market sponsored by the Commission titled "Breeze", "Easy Money" and "Mutual Benefits" were also shown to the students to further educate them on illegal (Ponzi) schemes, financial inclusion and wise investments.

VII. Capacity Building for Shareholder Associations

As part of effort to strengthen and enhance the role of shareholders in Capital Market development, the Commission organized a two day workshop for Executives of the registered Shareholder's Associations on the theme "Understanding Corporate Governance in the Nigerian Capital Market".

5 Property and equipment

Movements in property and equipment during the year are as shown in note 10 on page 28 of these financial statements.

Report of the members of the Commission for the year ended 31 December 2014 (Cont'd)

6 Financial commitments

The Commission is of the opinion that all known liabilities and commitments have been taken into consideration in the preparation of these financial statements.

7 Auditors

The auditors, Messrs PricewaterhouseCoopers, having indicated their willingness, to continue in office as auditors of the Commission.

By order of the Commission

Edosa Kennedy Aigbekaen (Esq.) (Secretary to the Commission)

Abuja, Nigeria 25 March 2015

Securities and Exchange Commission Statement of Board members' responsibility

In accordance with the provisions of the Investments and Securities Act 2007, the Board of Commissioners is responsible for the preparation of the financial statements which give a fair presentation of the state of affairs of the Commission at the end of the year and its income and expenditure in accordance with International Financial Reporting Standards (IFRS) and in the manner required by the Financial Reporting Council of Nigeria Act.

The responsibilities include ensuring that:

- the Commission keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Commission and comply with the requirements of the Investments and Securities Act 2007
- ii. appropriate and adequate internal controls are established to safeguard its assets and to prevent and detect fraud and other irregularities;
- iii. the Commission prepares its financial statements using suitable accounting policies supported by reasonable and prudent judgments and estimates that are consistently applied; and
- iv. it is appropriate for the financial statements to be prepared on a going concern basis.

The Commissioners accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates in conformity with the Investments and Securities Act 2007 and in accordance with the International Financial Reporting Standard (IFRS).

The Commissioners are of the opinion that the financial statements give a fair presentation of the state of the financial affairs of the Commission and of its income and expenditure and cash flows.

The Commissioners further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

Nothing has come to the attention of the Commissioners to indicate that the Commission will not remain a going concern for at least twelve months from the date of this statement.

Signed on behalf of the Board of Commissioners by:

Dr. Suleyman Abdu Ndanusa, OON

REPORT OF THE INDEPENDENT AUDITOR TO THE MEMBERS OF THE SECURITIES AND EXCHANGE COMMISSION

Report on the financial statements

We have audited the accompanying financial statements of the Securities and Exchange Commission ("the Commission") and its subsidiaries (together, "the Group"). These financial statements comprise the statement of financial position as at 31 December 2014 and the statements of comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Directors' responsibility for the financial statements

The directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and with the requirements of the Investment and Securities Act 2007 and for such internal control, as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform our audit to obtain reasonable assurance that the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion the accompanying financial statements give a true and fair view of the state of the financial affairs of the Commission and the Group at 31 December 2014 and of their financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Investment and Securities Act 2007 and the Financial Reporting Council of Nigeria Act.

1. General information

These financial statements are the consolidated financial statements of the Securities and Exchange Commission ("the Commission" or "SEC") and three controlled structured entities namely the National Investors Protection Fund, Capital Market Development Fund and the Nigerian Capital Market Institute (NCMI) (hereafter referred to as 'the Group') for the year ended 31 December 2014. The Commission was established under the Securities and Exchange Commission Act (No. 71) of 1979 as amended by the Investments and Securities Act (ISA) No.29 of 2007. The principal activities of the Commission includes the following: registering and regulating securities exchanges, reviewing and approving mergers and all forms of business combinations and protecting the integrity of the capital market. The funds were entities designed to implement some of the Commission's activities and core mandate in the regulatory and supervisory role in the Nigerian capital market.

The Group came into existence during the 2013 financial year.

The address of the Commission's registered office is Plot 272 Samuel Ademulegun Street, Central Business District, Abuja, Nigeria.

These financial statements were authorised for issue by the Directors on 25 March 2015.

2. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to the years presented, unless otherwise stated:

2.1 Basis of preparation

These financial statements for the year ended 31 December 2014 have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). Additional information required by national regulations is included where appropriate.

These financial statements are presented in Naira, which is the Group's presentation currency. The figures shown in the financial statements are denominated in Naira and in thousands. The financial statements are prepared under historical cost concepts.

The preparation of financial statements in conformity with IFRSs requires the directors to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

(a) New standards, amendments and interpretations adopted by the group.

Amendment to IAS 32, 'Financial instruments: Presentation', on offsetting financial asset and financial liability'.

This amendment clarifies that the right of set-off must not be contingent on a future event. It must also be legally enforceable for all counterparties in the normal course of business, as well as in the event of default, insolvency and bankruptcy. the amendment also considers settlement mechanism. The amendment did not have a significant effect on the group financial statements.

Amendments to IAS 36, 'Impairment of assets', on the recoverable amount disclosures for non-financial assets. This amendment removed certain disclosures of the recoverable amount of CGUs which had been included in IAS 36 by the issue of IFRS 13. This amendment did not have effect on the group financial statements.

IFRIC 21, 'Levies', sets out the accounting for an obligation to pay a levy if that liability is within the scope of IAS 37 'Provisions'. The interpretation addresses what the obligating event is that gives rise to pay a levy and when a liability should be recognised. The Group is not currently subjected to significant levies so the impact on the Group is not material.

Amendment to IAS 19 regarding defined benefit plan. These narrow scope amendments apply to contributions from employees or third parties to defined benefit plans. The objective of the amendments is to simplify the accounting for contributions that are independent of the number of amendments is to simplify the accounting for contributions that are calculated according to a years of employee service, for example, employee contributions that are calculated according to a fixed percentage of salary. This amendment did not have significant effect on the group financial statements.

Other standards, amendments and interpretations which are effective for the financial year beginning on 1 January 2014 are not material to the group.

(a) Standards, amendments and interpretations issued but not yet effective.

IFRS 9, 'Financial Instruments' (effective for periods beginning on or after 1 January 2018):
IFRS 9 addresses classification and measurement of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains but simplified the mixed measurement model and establishes three primary measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through OCI and fair value through P&L. The basis of classification depends on the entity's business model and contractual cash flow characteristic of the financial asset. Investment in equity instruments are required to be measured at fair value through profit or loss with irrevocable option at inception to present changes in fair value in OCI not recycling. There is now new expected credit losses model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. The group is yet

to assess IFRS 9's full impact.
IFRS 15, 'Revenue from contracts with customers' (effective for the period beginning on or after 1
January 2017):

IFRS 15 deals with revenue recognition and establishes principles for reporting useful information to user of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity contract with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 'Reveue' and IAS 11 'Construction contract' and related interpretations. The group is still assessing the impact of IFRS 15.

There are no other IFRS or IFRIC issued but not yet effective that are relevant to the Commission. Amendment to IAS 16, 'Property, plant and equipment' and IAS 38,'Intangible assets'(effective for the period beginning on or after 1 January 2016):, on depreciation and amortisation. In this amendment the IASB has clarified that the use of revenue based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. The IASB has also clarified that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. This Group is not currently using revenue based methods to calculate the depreciation of an assets.

Amendment to IAS 19, 'Employee Benefits' '(effective for the period beginning on or after 1 January 2016):

Discount rate: regional market issue - The amendment to IAS 19 clarifies that market depth of high quality corporate bonds is assessed based on the currency in which the obligation is denominated, rather than the country where the obligation is located. When there is no deep market for high quality corporate bonds in that currency, government bond rates must be used.

(b) Early adoption of standards

The Group did not early adopt any standards.

2.2 Consolidation

The financial statements of the consolidated subsidiaries used to prepare these financial statements were prepared as of the parent company's reporting date. The consolidation principles have been applied consistenly.

(a) Consolidated Structured Entities

The consolidated financial statements of the Group comprise the financial statements of the parent entity and the three controlled structured entities as at 31 December 2014. Consolidated structured entities are entities over which the Commission has control.

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements.

The National Investors Proetection Fund, Capital Market Development Fund and Nigerian Capital Market Institute are structured entities set up for investor protection against losses from systematic failures in the capital market, development of the capital market and education and training of the investing public in Nigeria.

The Commission does not have any direct or indirect shareholding in these entities. However, based on the evaluation of the substance of the relationship between the Commission and these funds, the Commission has practical ability to direct the relevant activities of these funds, power over the funds, is exposed to, or has rights to, variable returns from its involvement with the funds and has the ability to affect these returns through its power over the funds. Once control is established, the result of a structured entity is consolidated.

Specifically, the Commission controls an entity if and only if the Commission has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- exposure, or rights, to variable returns from its involvement with the investee, and
- the ability to use its power over the investee to affect its returns.

A business is defined as an integrated set of activities and assets that is capable of being conducted and managed for the purpose of providing a return in the form of dividends, lower costs or other economic benefits directly to investors or other owners, members or participants. Structured entities that do not constitute businesses are not consolidated.

The Commission re-assesses whether or not it controls a structured entity if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a structured entity begins when the Commission obtains control over the structured entity and ceases when the Commission loses control of the structured entity. Assets, liabilities, income and expenses of a structured entity established during the year are included in the Group's financial statements from the date the Commission achieve control until the date the Commission ceases to control the entity.

(b) Consolidation and Inter-company balances

The integration of the financial information of structured entities into the Group's financial statements is based on consistent accounting methods and inter-company transactions and balances are eliminated on consolidation.

Inter-company transactions, balances and intragroup gains on transactions between Group entities are eliminated. Intragroup losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred.

Foreign currency translation 2.3

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the Group operates ("the functional currency"). The financial statements are presented in Naira , which is the Group's presentation currency.

(b) Transactions and balances

Foreign currency transactions (i.e. transactions denominated, or that require settlement, in a currency other than the functional currency) are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured.

Monetary items denominated in foreign currency are translated with the closing rate as at the reporting date. Non-monetary items measured at historical cost denominated in a foreign currency are translated with the exchange rate as at the date of initial recognition; non-monetary items in a foreign currency that are measured at fair value are translated using the exchange rates at the date when the fair value was determined.

Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

Financial assets and liabilities 2.4

A) Initial recognition and measurement

Financial instruments at fair value through profit or loss are initially recognised at fair value while transaction costs, which are directly attributable to the acquisition or issue of the financial instruments, are recognized immediately through profit or loss. Financial instruments that are not carried at fair value through profit or loss are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial instruments.

2.4.2 B) Subsequent measurement

Subsequent to initial measurement, financial instruments are measured either at fair value or amortised cost depending on their classification.

C) Classification and related measurement

Management determines the classification of its financial instruments at initial recognition. The Group uses trade date accounting for regular way contracts when recording financial asset transactions

i) Financial assets

The Group classifies its financial assets in terms of the following IAS 39: Financial Instruments: Classification and Measurements categories: financial assets at fair value through profit or loss; loans and receivables; held-to-maturity financial assets; and available-for-sale financial assets.

a) Financial assets at fair value through profit or loss

This category comprises two sub-categories: financial assets classified as held for trading, and financial assets designated by the Group as fair value through profit or loss upon initial recognition (the so-called "fair value option").

A financial asset is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorized as held for trading unless they are designated and effective as hedging instruments.

For those designated upon initial recognition as at fair value through profit or loss (fair value option), this designation cannot subsequently be changed. According to IAS 39, the fair value option is only applied when the following conditions are met:

- the application of the fair value option reduces or eliminates an accounting mismatch that would otherwise arise or
- the financial assets are part of a portfolio of financial instruments which is risk managed and reported to senior management on a fair value basis or
- the financial assets consists of debt host and an embedded derivatives that must be separated.

Financial instruments included in this category are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in profit and loss. Interest income and dividend income on financial assets held for trading are included in profit and loss respectively. At the reporting dates covered by these financial statements , the Group had no financial assets classified as financial assets at fair value through profit or loss.

b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- those that the Group intends to sell immediately or in the short term, which are classified as held for trading, and those that the entity upon initial recognition designates as fair value through profit or loss;
- those that the Group upon initial recognition designates as available-for-sale; or
- those for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

Loans and receivables are subsequently measured at amortized cost using the effective interest rate method. Interest income is included in 'Interest income' in the profit or loss.

The Group's loans and receivables includes cash and cash bank balances, staff loans and other receivables.

c) Held-to-maturity financial assets

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity, other than:

- those that the Group upon initial recognition designates as fair value through profit or loss;
- those that the Group upon initial recognition designates as available-for-sale; or
- those that meet the definition of loans and receivables.

These financial assets are subsequently measured at amortised cost using the effective interest rate method. Interest income is included in 'Interest income' in the statement of profit or loss.

The Group's investment in held to maturity financial assets include Federal Government bonds and treasury bills

d) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified as loans and receivables, held-to-maturity financial assets or financial assets at fair value through profit or loss. No financial assets designated as available-for-sale exist at any of the reporting dates covered by these financial statements.

Available-for-sale financial assets are subsequently measured at fair value with fair value gains and losses recognized in other comprehensive income. Interest calculated using the effective interest method is recognized in 'Interest income', with dividend income included in 'Other income'. When available-for-sale financial assets are sold or impaired, the cumulative gain or loss recognized in separate reserve in equity are reclassified to profit or loss.

The Group has no financial assets classified as available for sale.

ii) Financial liabilities

a) Financial liabilities at fair value through profit and loss

Financial liabilities are classified as at fair value through profit or loss (including financial liabilities held for trading and those designated at fair value through profit or loss) and financial liabilities at amortized cost. The Group only has financial liabilities at amortised cost.

Financial liabilities that are not classified as at fair value through profit or loss are measured at amortized cost using the effective interest method.

The Group's holding in other financial liabilities is sundry creditors.

The Group may choose to reclassify a non-derivative financial asset held for trading out of the held 2.4.3 Reclassification of financial assets for trading category if the financial asset is no longer held for the purpose of selling it in the near term. Financial assets other than loans and receivables are permitted to be reclassified out of the held for trading category only in rare circumstances arising from a single event that is unusual and highly unlikely to recur in the near-term. In addition, the Group may choose to reclassify financial assets that would meet the definition of loans and receivables out of the held for trading or availablefor-sale categories if the Group has the intention and ability to hold these financial assets for the foreseeable future or until maturity at the date of reclassification.

Reclassifications are made at fair value as of the reclassification date. Fair value becomes the new cost or amortized cost as applicable, and no reversals of fair value gains or losses recorded before reclassification date are subsequently made. Effective interest rates for financial assets reclassified to loans and receivables and held-to-maturity categories are determined at the reclassification date. Further increases in estimates of cash flows adjust effective interest rates prospectively.

2.4.4 Determination of fair value

At initial recognition, the best evidence of the fair value of a financial instrument is the transaction price (i.e. the fair value of the consideration paid or received), unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same

Subsequent to initial recognition, for financial instruments traded in active markets, the determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer price quotations. This includes quoted debt instruments on major exchanges and broker quotes. For example, the Nigerian Stock Exchange and quotes from the Financial Market Dealers Quotation (FMDQ).

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry Group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indication that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid offer spread or there are few recent transactions.

For other financial instruments, fair value is determined using valuation techniques. In thes techniques, fair values are estimated from observable data in respect of similar financial instruments using models to estimate the present value of expected future cash flows or other valuation techniques, using market inputs existing at the dates of the statement of financial position. For illiqu financial instruments, the fair values are further adjusted to compensate for the credit risks attached to the issuers.

2.4.5 Derecognition

Financial assets are derecognized when the contractual rights to receive the cash flows from these assets have ceased to exist or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred. Financial liabilities are derecognized when they have been redeemed or otherwise extinguished.

2.4.6 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

2.4.7 Impairment of financial assets

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- · Delinquency in contractual payments of principal or interest;
- · Significant financial difficulty of the issuer or obligor;
- A breach of contract, such as a default or delinquency in interest or principal payments;
- The disappearance of an active market for that financial asset because of financial difficulties; and
- · Observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in profit or loss. If a financial instrument has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e. on the basis of the Group's grading process that considers asset type, industry, geographical location, collateral type, past-due status and other relevant factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Impairment charges on financial assets are included in profit or loss within 'Other operating expenses"

2.5 Impairment of non-financial assets

An asset is impaired when the carrying amount is greater than the recoverable amount. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Additionally, intangible assets that have an indefinite useful life and are not subject to amortization are tested annually for impairment. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount.

The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows (cash-generating units). The impairment test may also be performed on a single asset when the fair value less cost to sell or the value in use can be determined reliably. Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

2.6 Revenue recognition

Interest income

Interest income for all interest-bearing financial instruments are accrued and recognized within 'Interest income' in the profit or loss using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.

When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses.

The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts. Where the estimated cash flows on financial assets are subsequently revised, other than impairment losses, the carrying amount of the financial assets is adjusted to reflect actual and revised estimated cash flows.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Fee income

Fees income are generally recognized on an accrual basis. Fee income arising from provision of service to capital market operators is recognized over the period of service rendered. The fees earned by the Group is for services rendered in the registration of bonds and shares, penalties and other market transactions such as approval of mergers and acquisitions transactions and other capital market transactions.

Fines and penalties raised for late submission of returns are recognised on an accrual basis less impairment. The income from fines and penalties is credited to the statement of profit or loss and other comprehensive income.

Cash and bank balances 2.7

Cash and bank balances include cash in hand, cash in current accounts, deposits held at call with banks and other short-term investments.

For cash flow purposes, cash and cash equivalents include cash in hand, cash in current accounts, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less including treasury bills with less than three months from original maturity.

Property and equipment 2.8

Land and buildings comprise mainly offices held within the country. All items of property and equipment used by the Group is measured at historical cost less depreciation. Cost includes expenditure that is directly attributable to the acquisition of the items. When parts of an item of property and equipment have different useful lives, they are accounted for as separate items.

An asset is recognized when it is probable that economic benefits associated with the item flow to the Group and the cost of the item can be reliable measured. Subsequent expenditures are included in the asset's carrying amount or are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

For replacement parts, the carrying amount of the replaced part is derecognized. All other repair and maintenance costs are charged to 'Other operating expenses' during the financial period in which they

Section 49(1&2) of the Land Use Act of 1978 makes land a freehold for government agencies. Consequently land is not depreciated. Depreciation of other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

- Buildings: 40 years
- Motor vehicles: 3 years
- Furniture and fittings: 4 years
- Computer equipment: 4 years

The depreciation charge for each period is recognized in profit or loss unless it is included in the carrying amount of another asset

The assets' residual values and useful lives are reviewed annually, and adjusted if appropriate.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount. These are included in 'Other income' in the profit or loss.

Construction cost and improvements in respect of offices is carried at cost as capital work in progress. On completion of construction or improvements, the related amounts are transferred to the appropriate category of property and equipment. Payments in advance for items of property and equipment are included as prepayments and upon delivery are reclassified as additions in the appropriate category of property and equipment.

The carrying amount of an item of property and equipment is derecognized either on disposal or when no future economic benefits are expected from the continuing use or disposal of the asset.

The gain or loss arising from the derecognition of an item of property and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Intangible assets 2.9

Intangible assets comprise computer software licenses. Intangible assets are initially recognized at cost. Intangible assets with a definite useful life are amortized using the straight-line method over their estimated useful life. Intangible assets with an indefinite useful life are not amortized. Generally, the identified intangible assets of the Group have a definite useful life. Costs associated with maintaining computer software programmes are recognized as an expense as incurred.

Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Group, are recognized as intangible assets when the following criteria are met:

- it is technically feasible to complete the software product so that it will be available for use;
- management intends to complete the software product and use or sell it;
- there is an ability to use or sell the software product;
- it can be demonstrated how the software product will generate probable future economic benefits;
- adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and
- the expenditure attributable to the software product during its development can be reliably measured.

Subsequent expenditure on computer software is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates.

Direct computer software development costs recognized as intangible assets are amortized on the straight-line basis over 4 years and are carried at cost less any accumulated amortization and any accumulated impairment losses.

2.10 Employee benefits

Defined contribution scheme

For defined contribution plans, the Commission pays contributions to publicly or privately administered pension insurance plans on a contractual basis. The Commission contributes a minimum of 7.5% of basic salary, housing and transport allowances, with the employee contributing a further 7.5%. The Commission has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available. Consequent to the promulgation of the new pension reform act 2014, the Group now contributes a minimum of 10% of basic salary, housing and transport allowances, with the employee contributing a minimum of 8% of the same emoluments. The new Pension Reform Act became effective on 1 July 2014.

Defined benefit scheme

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors, such as age, years of service and compensation.

The employer's obligation is calculated periodically by independent actuaries using the projected unit credit method. The liability recognized in the Group's statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the date of the Group's statement of financial position less the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service costs.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the yields of Federal Government Bonds of Nigeria as high quality corporate bonds are not available.

The fair value of the plan assets are determined using prices from the Nigeria stock exchange and FMDQ for listed equities and bonds. The other plan assets are maintained as short term placements with banks whose carrying amount approximates its fair value.

Remeasurement gains and losses are recognized in full in other comprehensive income when they

The Group recognises past service costs immediately in profit or loss.

The Group recognises interest cost on the defined benefit obligation as a net interest cost based on the net defined benefit asset or liability and the discount rate, measured at the beginning of the year. Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

2.11 Provision

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events for which it is more likely than not that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated.

2.12 Equity

Accumulated reserve fund

Accumulated reserve fund represents all the accumulated surpluses and losses from prior periods. In accordance with section 22(1) and (2) of the Fiscal Responsibility Act 2007, the Commission makes an annual appropriation representing twenty percent of the operating surplus of the Commission for the year to a general reserve fund.

All remaining surplus after the statutory appropriations to the general reserve fund is payable to the Federal Government of Nigeria not later than one month following the deadline for publication of the financial statements of the Group.

Capital reserve fund

Capital Reserve Fund represents one-fifth of the commission's operating cash surplus for 2007 and 2008 financial years that was transferred to this reserve before remittance of the balance to the Federal Government of Nigeria in compliance with section 22(1) of the Fiscal Responsibility Act 2007.

Capital grant

The capital grant received represents funds from the Federal Ministry of Finance in prior periods. No amount was received in the current period

2.13 Contingent liabilities and contingent assets

Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events or present obligations where the transfer of economic benefit is uncertain or cannot be reliably measured. Contingent liabilities are not recognized but are disclosed unless they are remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognized but they are disclosed in the financial statement when they arise.

3 Financial risk management

3.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the commission's financial performance.

Risk management is carried out by the finance department under policies approved by the board of commissioners. The Group's treasury department identifies, evaluates and manages financial risks in close co-operation with the commission's operating units. The board provides written principles for overall risk management, as well as written policies covering specific investment buying decisions and management of financial instruments and investment of excess liquidity.

3.2 Financial instruments

The Group's financial instruments are categorised as follows:

| Financial assets | Financial liabilities | |
|---|-------------------------|--|
| Amortised cost N'000 | Amortised cost N'000 | |
| | | |
| 45 252 401 | | |

| Held to maturity financial assets Held to maturity | 9,046,598 | - | |
| | | | |

3.3 Credit Risk

3.3.1 Management of credit risk

Credit risk is the risk that the Group will incur losses as a result of the failure of creditors and staff to meet their obligations. Credit risks essentially arise from granting loan facilities to staff members as well as failure of banks and bonds issuers to meet principal and interest payments on due dates. Credit risks are managed by regular monitoring of the ratings of banks and other related creditors.

3.3.2 Concentration of risks of financial assets with credit risk exposure

(a) Geographical sectors

The following table breaks down the Group's credit exposure at their carrying amounts as categorised by geographical region as of 31 December 2014 and 31 December 2013.

| Group At 31 December 2014 (N'000) | Staff loans and other receivables | Cash and balances in banks | Held to maturity financial assets | Total |
|---|-----------------------------------|----------------------------------|---|------------|
| Nigeria | 1,094,622 | 15,252,481 | 11,672,432 | 28,019,535 |

3.3.3 Maximum exposure to credit risk

The Group's maximum exposure to credit risk at 31 December 2014, is represented by the net carrying amounts of the financial assets set out in note 3.3.2 above.

3.4 Market risk

The Group takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices such as interest rates and foreign exchange rates.

3.4.1 Foreign exchange risk

Foreign exchange risk is the risk of adverse changes in currency exchange rates.

The Group operates its businesses in Nigeria and is not significantly exposed to foreign exchange risk arising from various currency exposures.

3.4.2 Price risk

The Group is not exposed to equity securities price risk because investment securities held are bonds classified as held to maturity on the balance sheet. Also, the Group is not exposed to commodity price risk.

3.4.3 Interest rate risk

Interest rate risk is the risk of adverse changes (effectively increases) in market interest rates and arises primarily from the bank deposits and placements which are usually held by the Group. The Group is exposed to cash flow interest rate risk, which is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rate risk.

Interest margins may increase as a result of such changes but may reduce losses in the event that unexpected movement arise.

The Group manages its exposure to this risk by regularly monitoring interest rates and placing funds in financial institutions with a strong financial pedigree and does review its placements decisions as may be required from time to time.

Sensitivity analysis - interest rate risk

An entity defines interest rate risk as the risk of loss arising from changes in interest rates that will affect future profitability or fair values of financial instruments. The Group is exposed to this risk on its investment securities and placements with Banks and mitigates this risk by actively monitoring changes in interest rate in its cash and interest-bearing investments.

The sensitivity analysis for interest rate risk illustrates how changes in the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates at the reporting date.

A 100 basis point movement in interest rates will result in increase (decrease) in interest income of N116.721 million at 31 December 2014 (31 December 2013:N90.466 million) in the profit or loss.

3.5 Liquidity risk

Liquidity risk is the risk that the Group does not have adequate assets to match its liability at all times. The liquidity risk exposure is related to our credit and investment risk profile. At 31 December 2014, management does not believe the current maturity profile of the Group lends itself to any material liquidity risk, taking into account the level of cash and bank deposits. The Group's bank deposits are able to be released at short notice when and if required.

The table below analyses the Group's financial liabilities into relevant maturity Groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

3.6 Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for owners and benefits for other stakeholders and to maintain an optimal capital structure.

The Group capital is made up of capital fund and capital reserve fund.

The Group monitors capital on an ongoing basis so as to ensure that its capital reserves are adequate to fund its operations.

The Group's strategy is to maintain adequate capital reserves.

3.7 Fair value estimation

(a) Financial instruments measured at fair value

The Group's investments are in government bonds, treasury bills and placement with banks which requires no fair value subsequent to initial (b) Financial instruments not measured at fair value

(ii) Fair valuation hierarchy

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable input reflect market data obtained from independent sources; unobservable inputs reflect the Group's market assumptions. These two types of inputs have created the following fair value hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

(c) Fair valuation methods and assumptions

(i) Cash and bank balances

Cash and bank balances represent cash and short term deposit held with various banks in Nigeria. The fair value of these balances is their carrying amounts.

(ii) Debt securities

The fair value of actively traded bonds and treasury bills are determined with reference to quoted prices (unadjusted) in an active market. The fair value is determined with reference to Level 1 on the fair value hierarchy.

(iii) Staff loans and other receivables

Staff loans and other receivables are carried at amortised cost net of provision for impairment. The estimated fair value of non current loans and receivables represent the discounted amount of estimated future cash flows expected to be received at current market rates. For the current loans and receivable, the carrying amount are carried at amortised cost net of provision for impairment. The current market rates are determined by a reference to the monetary policy rate plus margins as charged by the commercial banks.

(iv) Sundry creditors

Sundry creditors represents short term payables to third parties. The carrying value approximates the value required to settle these liabilities. Hence, the fair values of these balances approximate their carrying amount.

19 Retirement benefit obligations

Defined contribution scheme

The Commission and its employees make a minimum joint contribution of 15% of basic salary, housing and transport allowance to each employee's retirement savings account maintained with their nominated pension fund administrators.

Defined benefit scheme (a) Staff gratuity plan

The Commission had defined benefit plan in place where qualifying employees receives a lump sum payment based on the number of years served. The qualifying employees should have served at least five years. The active members of the defined benefit scheme were transferred out of the scheme on 1 January 2012. Consequently the members of the defined benefit plan at 31 December 2012 comprised of pensioners only. During the 2013 financial year, active executive employees became part of the defined benefit scheme again.

Funding policy: The Commission is obliged to make contributions into the plan assets to the extent that the net position is a deficit.

The table below outlines where the Group's defined benefit plan amounts and activity are included in the financial statements.

| | -6.2% | 6.9%Percentage of | hange in the defined | benefit obligation |
| | | | | |

Effect of change in mortality

Based on

| . 7 | Decrease in assumption by | actual discount rate | Increase in assumption by |
|---|---------------------------|----------------------|---------------------------|
| Assumptions | 1 year | of 14% | |
| Average long term discount rate (p.a.) | (2,627,131) | (2,602,783) | 1 year |
| Percentage change in the defined benefit obligation | 0.9% | (2,002,/03) | (2,577,180) 1.0% |
| 31 December 2013 | Effect of cl | hange in the disc | count rate |
| | | Based on | |
| | Decrease in | actual | Increase in |
| | assumption by | discount rate | assumption by |
| Assumptions | 1% | of 13% | 1% |
| Average long term discount rate (p.a.) | 2,706,192 | 2,528,062 | 2,371,638 |
| Percentage change in the defined benefit obligation | 7% | 0.5 | -6% |
| | Effect of chang | e in the Pension | increase rate |
| | | Based on | |
| | Decrease in | actual | Increase in |
| | assumption by | discount rate | assumption by |
| Assumptions | 1% | of 13% | 1% |
| Average long term discount rate (p.a.) | 2,722,067 | 2,528,062 | 2,356,807 |
| Percentage change in the defined benefit obligation | 8% | | -7% |
| | Effect | of change in mor | |
| | | Based on | Nontries. |
| | Decrease in | actual | Increase in |
| | assumption by | discount rate | assumption by |
| Assumptions | 1 year | of 13% | 1 year |
| Average long term discount rate (p.a.) | 2,554,782 | 2,528,062 | 2,500,004 |
| Percentage change in the defined benefit obligation | 1% | | -1% |

The sensitivity analysis was performed by recomputing the liability to show the effect of:

i) the change in the discount rate assumption on the defined benefit obligation by adding and subtracting 1% to the discount rate; and

ii) the change in the pension increase rate assumption on the defined benefit obligation by adding and subtracting 1% to the pension increase rate.

iii) the change in the the mortality assumption on the defined benefit obligation by increasing and decreasing the post-retirement age rating by 1 year.

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the statement of financial position. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period

Capital grant 20

The capital grant represents funds received from the Federal Ministry of Finance in prior periods. No amount was received in the current period (2013: Nil)

Capital reserve fund 21

Capital reserve fund represents one-fifth of the commission's operating cash surplus for the 2007 and 2008 financial years which was retained after transferring 80% of the surplus to the Federal Government of Nigeria in compliance with section 22(1) of the Fiscal Responsibility Act 2007.

Reconciliation of profit to cash generated from operations 22

Contingent liabilities and commitments 23

Legal proceedings

The Commission has contingent liabilities amounting to N620 million arising from litigation and this represents the most likely outcome as assessed by the legal counsel.

Capital commitments

The Commission has no capital commitments during the period and the capital commitment of N98.417 million as at 31 December 2013 were not

Related party transactions

The Commission controls three structured entities namely the Capital Market Development Fund, the National Investors Protection Fund and the Nigeria Capital Market Institute. These structured entities were formed by the Commission, and are companies limited by guarantee hence they have no share capital. The Commission controls the three entities as the activities of the structured entities are controlled by the Commission's personnel and those activities are in furtherance of the Commissions' goals and objectives. The structured entities are also wholly funded by the Commission.

24.1 Key management personnel compensation

Key management personnels in the Commission are executive members of the Board of the Commission. The compensation paid or payable to key management for employee services is shown below:

| management to comprey to the | Group | | The Commission | |

Balances with related parties

This represents the total amount of transactions between the Commission and its related parties stated below:

| Group | Nature of balance | 31 December 2014 N' 000 | 31 December 2013 N' 000 | 31 December 2014 N' 000 | 31 December 2013 N' 000 |
|--|-------------------|-------------------------------|-------------------------------|-------------------------------|---|
| Nature of relationship Executive Commissioner | Loan | 9,183 | 12,190 | 9,183 | 12,190 |
| Executive Commissioner | Loan | 9,756 | 12,947 | 9,756 | 12,947 |
| Executive Commissioner | Loan | 10,000 | - | 10,000 | |
| The Commission | Nature of balance | 31 December 2014 N' 000 | 31 December 2013 N' 000 | 31 December 2014 N' 000 | 31 December 2013 N' 000 |
| Nature of relationship Executive Commissioner | Loan | 9,183 | 12,190 | 9,183 | 12,190 |
| Executive Commissioner | Loan | 9,756 | 12,947 | 9,756 | 12,947 |
| Executive Commissioner | Loan | 10,000 | | 10,000 | 100000000000000000000000000000000000000 |
| Capital Market Development Fund | Funds Pavable | 765,000 | 765,000 | 765,000 | 765,000 |
| National Investors Protection Fund | Accrued Charges | 6,148 | 6,148 | 6,148 | 6,148 |
| Nigerian Capital Market Institute | Funds Payable | 1,560,734 | 2,591,034 | 1,560,734 | 2,591,034 |

None of the loans to key management personnel is past due nor impaired. Hence no provision was required in 2014 (2013: nil) for the loans made to key management personnel. The loans are repayable monthly and the interest rate ranges between 1% to 2%. The repayment period ranges between 2 to 10 years.

The Funds to related parties arise mainly from funding arrangment between the Commission and Fund. They are short term in nature.

25 Interests in structured entities

The Board of Commissioners approved a transfer out of accumulated fund of N5bn for the National Investor Protection Fund (NIPF) and N5bn for the Capital Market Development Fund (CMDF). The total amount of N10bn (N5bn each) was maintained as a reserve for each of the funds in the Commission equity. Additionally, the Commission incorporated the Nigerian Capital Market Institute (NCMI) as a seperate entity to facilitate the growth and development of the Nigerian capital market through training and N5bn was set aside during the 2013 financial year.

| Principal consolidated structure Name of entity | Country of incorporation and place of business | Principal activity | 31 December 2014 | 31 December 2013 |

| Nigerian Capital Market Institute (NCMI) | Nigeria | losses Capital Market information dissemmination | 5,000,000 | 5,000,000 |

Existence of control

Control is evidenced by the subtance of the relationship between the Commission and the structured entities which includes;

- (i) the provision of initial funding for the operations and continued existence of the structured entities;
- (ii) the provision of the guarantee on which these structured entities were established (by the Commission);
- (iii) the fact that the Commission was involved in the design of the structured entities;
- (iv) the subscribers to the memorandum of association and the existing key management personnel (directors) of the structured entities are all employees of the Commission; and
- (v) the Commission have a commitment to ensure that the structured entities operate as designed.

National Investors Protection Fund

The National Investors Protection Fund was incorporated in March 2012 as a company limited by guarantee for the purpose of compensating investors (not covered by the National Investors Funds operated by the Nigeria Stock Exchange) who suffer losses due to systematic failures in the capital market. The National Investors Protection Fund has no shareholding structure.

The Commission provided the guarantee when the National investors Protection Fund was registered by the Corporate Affairs Commission and the subscribers to the memorandum of association at inception were all senior officials of the Commission.

Capital Market Development Fund

The Capital Market Development fund is an unincorporated structured entity. The Commission set aside funds for the purpose of facilitating the development of the capital market.

Nigerian Capital Market Institute

The Commission has interest in the Nigerian Capital Market Institute (NCMI), the erstwhile educational and training unit of the Commission. The Commission registered NCMI as a company limited by guarantee, so as to provide training and other capacity building initiatives for members of the investing public.

The Commission has a interest in the Nigerian Capital Market Institute which points towards the existence of control. This is reflected by the following:

- a) The key management personnel of the Institute are senior officers of the Commission i.e. the NCMI depends on the Commission for key management personnel. There are no external members appointed so far as the board of directors is yet to be duly constituted in line with the Articles of Association:
- The Institute's operations are dependent on funding from the Commission;
- c) A significant portion of the relevant activities of NCMI are directed by the Commission;
- d) The Commission has power over NCMI to affect the returns from the operations of the Investee, i.e. the Commission can determine the compensation policy, quantum of funds available for that purpose by injecting more resources. e.t.c

Under IFRS a business is defined as an integrated set of activities and assets that is capable of being conducted and managed for the purpose of providing a return in the form of dividends, lower costs or other economic benefits directly to investors or other owners, members or participants.

The nature of risks associated with the Commission's interests in the consolidated structured entities

The nature of risks associated with the Commission's interests in these funds is significantly in the provision of funding for their initial take off and subsequent maintenance. The Commission is committed to ensuring that the funds performed as designed and could be exposed to risk of non performance of these funds in event that they fail to discharge of their stated functions. The other risk lies with the guarantee the Commission provided on incorporation of some the entities (the Commission will provide further guarantee when the CMDF is incorporated). These activities exposes the Commission to potential adverse risks as the Commission might be required to inject more funds into the structured entities so as to continue as a going concern.

During the year 2013, the Commission set aside a total of N15 billion to the three structured entities as start up funding and is committed to providing more funds in future so as to ensure the sustainability of these funds. In the same vein, the Commission is committed to assisting the funds meet their cash and other funding requirements in the near future.

Significant restrictions

The income and property of the NIPF, CMDF and NCMI shall be applied solely towards the promotion of the objects of the funds as set forth in the respective memorandums of association, and no portion thereof shall be paid or transferred, directly or indirectly by way of dividend, bonus or otherwise howsoever, to the Commission or other members of the funds.

The summarised financial information of these consolidated structured entities are provided below. This information is based on amounts before inter-company eliminations.

Prior period corresponding balances

Certain prior period balances have been reclassified in line with current period presentation due to the following reasons:

- Interest income and other operating income to show the reclassification of interest on staff loans from other operating income to interest income. - Staff loans and other receivables - the separation of provisions for staff loans from provisions for receivables and sundry debtors and distinction of staff loans (non-current) from other receivables which are now reporting under current.
- Sundry and other creditors and provisions the reclassification of accrued charges (accruals) from provisions to sundry and other creditors.

The reclassification as shown below are not material enough to impact significantly the result of operations of the Group and the Commission for 2013, therefore the Group and the Commission did not prepare a third statement of financial position. (i) Interest income and other operating income
